ELEMENT ATTRIBUTE	DEFINITION & GUIDELINES
<b>NAME</b>	<b>Title Type</b>
<b>OBLIGATION TO USE</b>	<b>Mandatory</b> (when 'Video' or 'Audio' is selected from Media Type General)
<b>DEFINITION</b>	Paired with Media Type General, this metadata element further identifies if a media item exists in whole or as a portion of a parent video or audio program. This metadata is mandatory only for "Video" or "Audio" media items.
<b>ELEMENT DEPENDENCIES</b>	Media Type General (when 'Video' or 'Audio' is selected) Media Type Specific (only when 'Audio' is selected)
<b>CONTROLLED VOCABULARY</b>	episode full program segment selection or excerpt series
<b>QUANTITY PERMITTED</b>	1-1
<b>DATA TYPE</b>	Text String
<b>NOTES/GUIDELINES</b>	Select from the controlled vocabulary options provided. When 'Video' or 'Audio' is selected from the element Media Type General, then the terms from Title Type are presented to the cataloger. If 'Document', 'Image', or 'Interactive' is selected from the element Media Type General, no terms are selected from Title Type by the cataloger. If 'Video' was originally selected from Media Type General, and a Title Type is identified, no values are selected from the other metadata element named Media Type Specific. If 'Audio' was originally selected from Media Type General, and a Title Type is identified, then the cataloger has the option to select more specific descriptors from the element Media Type Specific.
<b>FORMAT/EXAMPLES</b>	See the controlled vocabulary picklist.
